

EasyFitness Website – Recommendations & Opportunities

Dear EasyFitness Team,

Thank you once again for giving me the opportunity to review your website and present my work. I truly appreciate the time you invested in our discussion.

First of all, I'd like to say that I believe the current website provides a strong foundation. It reflects the premium identity of the EasyFitness brand, has a clean and modern design, and communicates your services effectively.

After reviewing both the existing website and the new concept, I identified several opportunities that could further enhance the user experience and improve conversion performance.

1. Refine the Mobile Experience

The website is responsive; however, some sections could be better optimized for smaller screens.

Rather than simply adapting the desktop layout, I would recommend designing certain sections specifically for mobile users. This would improve readability, visual balance, and make the overall experience feel more natural on smartphones, where most visitors are likely to access the website.

2. Strengthen the Hero Section

The Hero section creates the first impression of the brand.

I believe it could communicate the value proposition more clearly by emphasizing:

2

- the premium positioning,
- member benefits,
- stronger calls-to-action,
- and trust indicators such as ratings or community size.

The objective is to capture attention within the first few seconds.

3. Increase Social Proof

One of the biggest opportunities is to showcase the experiences of your members.

Examples include:

- Google Reviews
- Member testimonials
- Success stories
- Transformation journeys
- Community highlights

These elements help build trust and encourage new visitors to take action.

4. Optimize the Conversion Journey

Every section should naturally guide visitors toward booking a trial or becoming a member.

This can be achieved by:

- stronger CTA placement,
- simplified forms,
- reducing friction,
- and creating a clearer user journey from discovery to conversion.

5. Improve Storytelling

- Rather than presenting features independently, I would recommend structuring the homepage around the EasyFitness experience:
- **Fitness** → **Recovery** → **Wellness**
- This creates a stronger narrative and reinforces the brand's premium positioning.

6. Enhance the Membership Presentation

The membership section could become easier to compare by:

- highlighting the recommended plan,
- presenting benefits more visually,
- and simplifying the decision-making process.

7. Performance & SEO

Additional improvements could include:

- performance optimization,
- technical SEO enhancements,
- improved page structure,
- and content targeting local search intent.

These improvements would support long-term organic growth.

8. Long-Term Digital Growth

Beyond the homepage, I believe there is an opportunity to continuously improve EasyFitness's digital ecosystem through:

- Conversion Rate Optimization (CRO)
- Landing pages for marketing campaigns
- Website maintenance and continuous improvements
- User experience optimization
- Performance monitoring
- Analytics and data-driven improvements
- Development of new features as the business evolves

Final Thoughts

EasyFitness already has a strong digital presence and a premium brand image.

My recommendations are not intended to replace that foundation, but to build upon it by creating an even more engaging user experience, strengthening customer trust, and improving conversion opportunities.

I would be excited to contribute to the continued growth of EasyFitness and help transform the website into an even stronger business asset.

Thank you once again for your time and consideration.

Best regards,

Arnaud MALANDA
